

THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta, Thursday, Oct. 8th 1938

No.

YOUR COUNTRY NEEDS YOU

Perhaps you shrink from these words; and who can blame you? They recall all too vividly the patriotic fervor of a nation in arms and the epilogue of horror and heart-break. But, although the call is more urgent for your help in a crisis, your country needs you just as surely in the cause of peace and progress. If you and your neighbors are prosperous, your country prospers. If you and your neighbors are well informed and progressive, the whole country reaps the benefit.

Greater progress, higher standards of living, better ways of life, are possible to an informed people. It is your privilege to be informed fully on all matters of importance through a free press. Make full use of this freedom, denied in so many other countries. Be informed. Keep a voice in your own government.

Hints Dropped Regarding Bonuses For Wheat

Hints are being dropped here and there in Western Canada, that the wheat farmers on the prairies are very foolish to accept bonuses from the federal government in the way of a fixed minimum price. Speakers and writers who take this stand point out that wheat is a world product and must eventually face world prices; that obtaining artificially high domestic prices at the expense of the taxpayer is uneconomic, does not increase the wealth production of a country and is bound to lead to reprisals; and that producers of other primary products can with all justice ask for the same treatment from the government.

The old idea that the western wheat producer must cheerfully submit to world price levels no matter how low is hard to down, and the strange part of it is that most of the men who advance these arguments against the bonusing of wheat producers are themselves profiting from artificial price fixing. Let the who is without this sin cast the first stone."

What critics of a fair minimum price for wheat fail to realize is that Western Canadian farmers are fed-up on economic sophistries. They want to deal in hard facts and they know well the whole price structure in Canada is artificial, and consequently they determinedly defend that they share in the price protection so lavishly extended to others.

The importance of wheat production in the national economic scheme makes it worthy of bonusing when price disasters threaten. Over the years wheat is the most important commodity in Canada's export trade. The railways look upon a big crop as a god-send and they depend upon its carriage for a considerable proportion of their earnings. Western wheat-farmers are the best customers of manufacturing interests. Without the wheat producers of the prairies Canada indeed would be a poor country.

If other primary producers can show that their production is nearly as important as is the wheat growing industry, by all means let them be bonused too. But the overwhelming importance of the wheat growing industry, in Canada places it in a position by itself.

A grain trade speaker in Calgary stated that undoubtedly pressure from the Wheat Pools had led to the setting of the peg at a generous price. The pools have no apology to offer. They know that the pegging of the price was really most unpopular in or-

thodox business circles, but they are determined that the wheat farmers of the West are no longer to become "forgotten men", the virtual slaves of the Canadian industrial system.

Grain producers should realize the desperate struggle that is going on. They should understand that their only hope for a measure of protection lies in concentration of effort. Without the strength afforded by unity they are utterly helpless.

This year has demonstrated in a most outstanding way the need for economic union among the Western Canadian farmers. The lesson should be borne in the conscience of every one who depends for a livelihood on the production of grain.

Make no mistake, the minimum price of 80c a bushel, obtainable from the Wheat Board this year was secured in the face of determined opposition although much of it was silent and secretive.

A. T. A. MEETING

The Cereal Agricultural Improvement Association will hold a special meeting in the Cereal Community Hall, on Wednesday evening, Oct. 12th at 2:00 p. m.

Speakers

C. D. Lane, Chairman Neutal Hills Livestock Board
A. Newman, Dominion Livestock Fieldman.
J. L. Eaglesham, Supervisor A. I. A's,
K. H. Walker, Agricultural Fieldman.

Matters pertaining to Livestock Improvement and marketing, Water—Development, and other matters pertaining to A. I. A. activities will be discussed.

Every A. I. A. member should be at this meeting. Every farmer should be an A. I. A. member:

H. J. Westphal
Sec'y, Cereal A. I. A

Local NEWS

Miss Kathleen Proudfoot and Jas. Proudfoot who are attending normal school at Calgary, spent the week end at the home of their parents Mr. and Mrs. Lorne Prondfoot.

Messrs Spreeman and Miss Spreemrn left for Qlds last week where they will assist their father with the harvest there, after having completed their harvest here.

Mr. Jas. Wilson who is attending normal school at Calgary, spent the week end with his parents, Mr. and Mrs. W. Wilson.

Grace Stewart daughter of Mr. and Mrs. N. D. Stewart, spent a few days last week with friends in town.

Mr. Gordon Anderson went to Calgary last week where he received medical attention.

Mr. J. E. Cooley and son Floyd motored to Calgary on Friday.

Miss Crissie and Gordon Coutts who spent two weeks on the farm returned to school Monday.

Mr. and Mrs. P. Petersen of Scandia, were Chinook business visitors this week.

Mrs. Lyster of Yonngstown, was a town visitor on Wed.

Another Dragon To Slay

It would be difficult to conceive of a more worthy movement of an humanitarian character than the drive which is now being launched across the Dominion to make co-ordinated and well directed attack on one of the greatest scourges to which human flesh is heir—cancer.

The fact that to date medical science has been unable to ascertain the cause of cancer or to find a specific cure, once an advanced stage of the disease has been reached, should not dispose people to throw up their hands and admit defeat, but, on the contrary this, coupled with the further fact that the disease is on the increase, should act as a stimulant to the efforts which are now being instituted to mitigate the extent and severity of this menace and later, perhaps, to ensure its eradication.

Public Aid Needed

Eminent medical authorities, who have just completed a mission tour across Canada in an effort to enlist public support for an organized campaign against this dread disease, freely admit that the medical profession can do nothing more than it is now doing in its attempts to reduce the incidence and death toll from cancer without public support.

In other words, it is made quite clear that unless people who have cause to suspect or fear cancerous infection of their bodies, visit their doctors on the first breath of suspicion and thus ensure early diagnosis, there is no possibility of further reducing human suffering and loss of life from this cause, at any rate until such time as its cause and cure may be discovered in the laboratory, or elsewhere.

This, of course necessitates general public knowledge of symptoms which may or may not indicate the onslaught of cancer in its earliest stages. In view of the insidious nature of the disease, this knowledge is the most valuable ammunition which can be used in the battle against cancer at the present stage of medical research and must remain so until science itself reveals some of the mysteries surrounding its cause and cure.

Public Enemy No. 2

The facts show that in this country cancer ranks second to heart disease as the greatest killer of mankind. Last year between 11,000 and 12,000 residents of this Dominion died from cancer and next year the disease will send as many or more to an untimely grave, unless the public take the necessary precautions to reduce the toll.

That it is not difficult to take out at least a partial insurance policy against death from cancer is quite evident when the list of conditions which may indicate cancer in its early stages, as outlined by these authorities are known and heeded. They are: a cracked lip which won't heal; a sore tongue which continues to be sore; a hardness or lump in the breast which gives no pain; a hoarseness of the voice which persists past the duration of a common cold; difficulty in swallowing food; symptoms of vague indigestion on the part of those who thought they had a cast iron stomach; a wart or mole which for no particular reason begins to grow rapidly; an unnatural and persistent bleeding from any part of the body or a comparatively sudden alteration, in any manner, of usual bowel evacuation habit.

"If you have discovered any of these signs and symptoms," according to Dr. A. T. Bazin of Montreal, Professor of Surgery at McGill University, "the chances are three to one against cancer, but on the other hand the chances are one in four that early cancer is the cause."

"If this information means anything at all, it indicates the immediate necessity of the person noting any one of these suspicious conditions immediately consulting his or her physician and then as Dr. Bazin says, 'the problem is then his, also' the responsibility, unless you refuse to accept his advice."

A Delayed Campaign

In the light of the unchallenged statement that a large percentage of cancer victims do not present themselves to their medical advisers until they have passed the cancer in its early stages, as outlined by these authorities, the information now being given to the public through the efforts of the Canadian Medical Association and the Canadian Society for the Control of Cancer can readily be understood. The pity of it is that this campaign has not been initiated earlier in Canada as it has been in some other countries. Many lives now lost might have been saved.

Taking into consideration the nature of the disease, its growing incidence and the public need for enlightenment if its toll is to be curtailed, the argument that the medical profession may frighten the people to death by giving the information necessary for their protection is entirely specious. Lord Moyrhan of Leeds and London, England, one of the greatest of British surgeons who instituted a similar campaign in the Old Land is quoted to have met this charge by stating: "I am frightening them to life." As Dr. Bazin states: "Many people have died from cancer. No one has died from fear of cancer."

Will Continue Research

Professor Freund, formerly of Vienna, Working in London
In London is Professor Ernst Freund, 74-year-old Viennese medical expert, who has worked for over 50 years on cancer research. He is now to continue his work in a specially-built laboratory in London, which reports the London Daily Sketch. The American millionaire diplomat, Frederick Pearson, will finance the installation of a special research station as an annex to the West London hospital. Arrangements will be concluded now that members of the hospital board, who have been on holiday, have returned to London. Professor Freund is in London with his assistant, Frau Dr. Kaminer, who has helped him in his work for over 20 years in Vienna, where she was second in command at the Pearson Research Institute, now to be transferred to London.

Still, if you haven't the right to enter a stranger's home by the door, what right have you to enter by the telephone?

Government statistics show that the average family in Australia eats 1,172 kinds of food.

TAKE THE LEAD OUT OF YOUR LEGS

Get Oxygen in Your Blood and You'll Get the Pep that Sends You Bouncing Up the Stairs.

People who suffer to death the chronic oxygen lack have been completely cured by them. Just as surely you are slowly making up for your blood's lack of oxygen. But circulates are your oxygen-carriers. They carry the oxygen from the lungs to every part of your system. Without enough oxygen-carrying corpuscles, your energy, life, stomach and bowels slow down. Your skin sags, you feel, often dizzy. Your nerves may become jittery—your life quickly—fed depressed.

What you need is Dr. Williams' Pink Pills. These pills help you make more and better red corpuscles and thus increase the oxygen-carrying power of your blood. Dr. Williams' Pink Pills today at your drugist and see for yourself how easily this time-proven blood-builder will help you.

Menu Cards Were Popular

Guests At Royal Luncheon In Versailles Waxed Extra Coppy
The menu for the state luncheon at Versailles this summer, honoring the British King and Queen, was printed on cream paper in the style of type found in first editions of Voltaire. So popular were the menu cards that one guest was heard to offer £2 for an extra copy to take back to his family. Each guest received a reproduction in bronze of the famous medal struck by Louis XIV to commemorate the completion of the chateau in 1687. The King and Queen received similar medals in gold.

Earnings Of The Quints

Audit Of Their Finances Shows Amount Is \$800,000
The Dionne Quintuplets have earned \$800,000 since their birth four years ago. May 22, it was revealed recently in audited statement of their finances. The statement was made by Percy D. Wilson, Ottawa, one of their guardians, and Keith Munro, their business manager, to a meeting of the board of guardians at North Bay, Ont.

Hardship Persists

Many folks now have electric clocks and are relieved of the hardships of our forefathers who had to wind the time-piece nightly. However, no mechanical gadget yet has done away with the necessity of putting out the cat.

A lightweight, collapsible, portable house designed for conveyance on the roof of an automobile has recently been patented. It is reported that the house will sell for less than \$100.

Perhaps you know that Italy has a king. But he is not working at the job.

A good deal of horse sense went with the horse.

"LIGHT UP WITH OGDEN'S"

You'll begin with delight at the friendly flavour of this grand-tasting cigarette tobacco OGDEN'S Fine Cut has lighter for the preceding four weeks, and 12,985 for the four weeks ended July 31, 1937. Canada supplied 4,648 cases, and the United States 2,409.

Had Equal Right

Quick-Witted British Surgeon Had Prussian Officer Stumped

It is said that the face of Sir Louis Grieg seems always on the verge of laughter. King George V. once remarked that the company of Sir Louis was like a bracing tonic. Sir Louis and the present King were boyhood friends. They were together in the training ship Cumberland. Later Sir Louis became the Duke of York's equerry. He has been a sportsman all his life. As a youth he captained the Scottish international football team four times. In tennis he and the Duke of York won the doubles title in the Air Force. He served overseas as a naval surgeon. After the fall of Antwerp he was captured when he stayed behind to tend the wounded. A typical Prussian officer demanded of him: "What are you doing in Belgium?" Quick-witted Sir Louis replied: "If it comes to that, what are you doing in Belgium?" The Prussian was stumped.

SELECTED RECIPES

CHOCOLATE FUDGE

3 cups white sugar
1 cup Bee Hive Golden Corn Syrup
1/2 cup milk, evaporated
1/2 cup water
2 tablespoons butter
2 squares cooking chocolate
1 teaspoon vanilla
1 teaspoon salt
Melt butter and chocolate slowly together. Add all other ingredients except vanilla and boil until it forms a firm ball in cold water, stirring occasionally to prevent burning. Remove from fire and let stand until lukewarm. Add vanilla and beat until it gets fluffy, when immediately turn it out on buttered tin. Nuts, cherries or raisins may be added while beating.

DIVINITY FUDGE

1 cup Bee Hive White Corn Syrup
1/2 cup cold water
2 cups white sugar
2 egg whites
1 teaspoon vanilla
Few grains salt
Cook syrup, water and sugar together until it forms a firm ball in cold water. Beat egg whites with salt until stiff. Add syrup and vanilla. Add vanilla and beat until thick. Variations: Broken walnuts, dry cherries, candied ginger, etc. Turn out on buttered tin.

Here's A Suggestion

How To Keep Roosters From Crowing Early In Morning.

Pueblo police urged local poultry growers to follow the suggestion offered by Laura M. Smith of Canon City, Colo., for making possible a morning sleep in the vicinity of a chicken ranch. "We rebuilt the hen roosts and placed them near the ceiling so that when one would raise his head to crow he would bump his head on the ceiling and changed his mind," she explained. "So they never crowed until they were on the ground."

Changed Very Little

The air pioneer Orville Wright, was 67 on Aug. 20. It is 35 years since his famous flight with a heavier than air machine, with his late brother. It is said that the control system he invented has changed very little.

In ancient Russia unfaithful wives were buried waist-deep in damp earth and left to die of starvation.

The 20 Latin American countries are estimated to have now over 130,000,000 people.

Another Canadian First

Canada Ships Canned Tomato Juice To United Kingdom

According to the statistics of the Imperial Economic Committee, Canada leads in shipments of canned tomato juice to the United Kingdom. Arrivals of canned tomato juice at the principal British ports during the four weeks ended July 30, 1938, amounted to 7,057 cases, compared with 5,949 for the preceding four weeks, and 12,985 for the four weeks ended July 31, 1937. Canada supplied 4,648 cases, and the United States 2,409.

Imports of tomato juice into the United Kingdom during the first seven months of 1938 totalled 29,068 cases, of which Canada supplied 16,811, the United States 10,042, and other countries 1,915 cases.

Is Really Important

Writer Tells Some Interesting Facts About Letter "K"

"Someone has decided," says an exchange, "that the letter 'k' is the most unfortunate letter in the alphabet, because it is always out of cash, forever in debt, never out of danger. No little credit is due, however, in that it is never in war, and always in peace. And we are deeply indebted to this little letter, since it is the beginning of existence, the commencement of ease, and the end of trouble. Without it there would be no meat, no life, and no heaven. It is the centre of honesty, and, although it starts off in error, it ends in making love perfect."

Earth Is To Blame

Changes Rate Of Rotation But Moon Keeps Even Pace

A scientist offered the moon exonerated of a 50-year-old charge of irregularity in its motion. Dr. Ernest W. Brown, professor of astronomy at Yale University, says the earth was to blame all the time. Writing in the annual report of the Smithsonian Institution, Dr. Brown said a check of observations of the sun, moon and earth for the last 150 years disclosed sudden, irregular changes in the rate of the earth's rotation on its axis. Half a century ago, astronomers believed it was the moon's motion which varied.

FETCHING NEW "DIRNDL" DRESS!

By Anne Adams

"Debonair and individual" is the phrase for this striking new junior frock—a new look in waist-line should make it the favorite of a "six to sixteen" wardrobe! Anne Adams' designed Pattern 4930 for growing bodies—that's why elastic is such as splendid idea for these "dirndl" waist and sleeve strings. And it's very easily inserted. Don't you like the neat button-front yoke that merges into soft "action" gussets? So easily followed is the Illustrated Sewing Instructor that a teen age lass could make this frock herself and find it almost as simple to do as a doll's dress. Sew it with short or long sleeves for classroom and after-school wear. Perfect in chills or synthetics!

Pattern 4930 is available in girls' junior sizes 8, 10, 12, 14, 16, 18. Size 10 takes 2 1/2 yards 36 inch fabric. Send twenty cents (20c) in stamps cannot be accepted for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Patterns Dept., Winnipeg Newspaper, 175 McDermott Ave. E., Winnipeg.

Persia Completes Railroad

Build 860-Mile Line Without Any Outside Financial Help

By completing the railroad from Bandar Shah on the Caspian Sea to Bandar Shapur on the Persian Gulf, the government of Iran (formerly called Persia) has provided a means of transportation from north to south which is confidently expected not only to promote the development of the country but greatly to improve its means of defense. The road is 866 miles in length, in the south crossing the Luristan Mountains at a height of more than 7,000 feet and in the north rising almost to the same height in the Elburz Mountains.

Work on the line was begun seven years ago, and the section from the Caspian coast to Teheran, the capital, was opened by the Shah on February 10, 1937. It was supposed that the line would not be opened from sea to gulf until next year, but the war has apparently hastened the work faster than they expected. The cost of the railroad has been defrayed by Iran without aid from beyond its own borders. This imposed hardships on the country, but it may be repaid for these by the fact that it has no foreign bondholders to consider.

The Shah went by train to Saad Cheshmeh, 20 miles south of Teheran, on August 28, and himself completed the line, a brilliant assembly being present at the ceremony. Throughout the country as well as along the route the meeting of the rails was celebrated and Teheran was decked with flags.—New York Sun.

ARMS USELESS ON A WET DAY

Rheumatic Pains Relieved By Kruschen

Here is a noteworthy instance of the manner in which damp weather can affect the joints of one who is subject to rheumatic pains.

"I had been suffering from rheumatism very badly," a man writes, "and had such pains in my joints that I could hardly bear it, on a wet day especially. It pained me terribly to use my arms, and I was hardly able to walk. I tried two doctors but no relief. I was still as bad after the treatment."

"Then I was told to try Kruschen Salt, which I bought and used. So of course I have kept on with it, and I am now much better and have never felt so fit for years. I used to feel so miserable and sluggish, but now it is a pleasure to be able to work."—S.B.

The pains and stiffness of rheumatism are often caused by uric acid crystals in the muscles and joints. The Kruschen salt, in Kruschen's opinion, is stimulating the internal organs to healthy, regular activity, and help them to eliminate excess uric acid.

Many Things Happened

Excellent Crowd Into Five Minutes When Mine Cask Exploded

Explosion of a "white" cask in the basement of a distilling company in Chicago, Illinois, caused the injury of one workman; the splashing of 1,550 gallons of port all over the cellar; tripping of the sprinkler system which flooded the plant and turned in a fire alarm; collapse of a firebrick wall and the shattering of plate glass windows—all within five minutes.

Listed As Outstanding

Charlie McCarthy has talked Edgar Bergen into something else—"Who's Who in America." Venturist Bergen is one of 2,545 newswomen and men and women whose biographies are included in the 50th anniversary edition.

"Petroleum" was used centuries before the Christian era.

Like human beings, gorillas normally are right-handed.

Tragic Story

History Of The Colonization Of Greenland By Icelanders

Probably not in the history of colonial development is there a more tragic story than that of the colonization of Greenland by Icelanders nearly 1,000 years ago. The Danish government and its researchers have laid bare the whole gruesome tale of a 500 year effort that ended in the death of a population estimated at between 3,000 and 5,000. The world hardly realizes that Norway had actual control of the Greenland colony since 1361, and that it was sheer neglect which spelled the doom of its sons across the Atlantic.

Will the now available story of the Norse settlement in Greenland help in throwing some light on the "white" Indians of James Bay, and help also to establish the identity of the Europeans who discovered America?

Surely men who sailed across 2,000 miles of Arctic seas without compass or chart would not be deterred from crossing the short distance from the Norse settlements to the nearby mainland.

Can it be assumed that Norsemen in Greenland would wait in 500 years to explore their own immediate western neighborhood when it is known they explored far north in the Arctic seas?

Is it probable that one single small ship would carry enough men to so modify a James Bay tribe of Indians, as to give it numerous members who to-day would be taken for white men if they were white men's clothes?

Was there an effort of many members of the dying colony in Greenland to find a more fertile land? Are the "white" Indians the descendants of sailors from Norway who were wrecked in James Bay?—J. W. Curran in Sault Star.

A Wise Decision

Court Allows Young Stowaway To Enroll In Marine School

Bobby Simpson, New York, hero of two trans-Atlantic and two coastwise stowaway trips this summer, has enrolled in the New York Merchant Marine School from which he hopes to graduate in eight months. He is a full-fledged sailor, ready and eager for the seven seas. The 17-year-old ocean hobo told his guardian, to which he had been committed for his waywardness, "I love the sea and I want to be on it."

The battle of Lookout Mountain fought during the Civil War, was called "the battle above the clouds."

Like human beings, gorillas normally are right-handed.

POOR MAN'S GOLD

COURTNEY RYLEY COOPER

COPYRIGHT-COURTNEY RYLEY COOPER • W.N.U. SERVICE

CHAPTER V.—Continued

Mrs. Joyce laid aside her green cigarette holder and with that queer, coldly acquiescent mood which seemed a part of her, joined the rest of the group on the tiny verandah. The moon had risen shimmering the great expanse of Sapphire lake, lying now like an irregular plate of silver between rugged mounds of black velvet.

"It's an inlet, over there to the right," Hammond said. "Land on that and you'll be safe."

"Says," broke in Kay, with a little laugh. "From whom?"

"The Mounties. This is a booze trip, isn't it?"

Kay faced the aviator. "Timmy! You haven't gone in for bootlegging already?"

The tone was jesting, but Timmy was tired.

"It isn't against the law to bring liquor from American territory to American territory. I'm not sneaking anything into Canada."

"Who's this fellow who hired you?" Hammond asked. Curiosity pulled hard at him; he was sure it was the man who had frightened Jeanne Towers. Timmy rubbed his round face.

"Dammed if I know. He said his name was Lew Side. I think he makes for Around the World Amite."

Kay laughed, somewhat harshly.

"So that's what becomes of our darling Timmy. He comes into the new, unfettered North and immediately becomes a bootlegger."

"It was badly timed," Timmy Moon's nerves were raw, from a long session at the stick.

"Well, at least I'm honest about it. I'm not being a damned pretender."

"Why, Timmy," asked Kay, with an air of amazement. "Who's pretending?"

"We're all been pretending," said Timmy Moon. Jack caught the scent of liquor on his breath; and evidently Lew Snade, whoever he was, had been generous. "And I'm sick of it. We're up here and let's be honest as to why we're here."

"Timmy!" in the reflected light of the doorway, Hammond saw that the girl's face had gone white; there was rage in her eyes. The aviator did not notice.

"Don't Timmy!" he exclaimed. "We're all broke and we might as well say we're broke and be done with it!"

"Perhaps you'd better go to bed," said Mrs. Joyce icily.

"I think that's a good idea," Hammond took him by the arm. "Time for us to go, Timmy."

"Oh, all right," the round little pilot was grinning again. "I didn't mean to start any fireworks."

Hammond pulled him off the verandah and with an effort at a joking good-night to the two women, led him down the trail.

"Sorry I can't put you up in my cabin," he apologized, when they were only going toward town. "But we've only got two bunks there."

"Oh, I couldn't go, anyway. I've got to get out too early," Timmy rubbed his hands over his face.

"Wow, how a couple of shots can hit a fellow when he's tired."

"You rather spoke out of turn up there at the house," the miner suggested.

"Timmy raised his head, pulling hard for air."

"Yes, I guess I did," he confessed.

PATENTS

AN OFFER TO EVERY INVENTOR. List of inventions and full information sent free. THE RAMSAY COMPANY, Registered Patent Attorneys, 275 Bank Street, Ottawa, Canada.

—It was just like seeing a ghost. Did you hear me? I think I did. The poor fellow must have thought I'd gone crazy. I did feel like an idiot."

Hammond agreed that it was indeed a silly feeling. Soon he went onward, again to take the trail up to the cottage. But he carried with him an uneasy premonition that Jeanne Towers had not told the truth.

Kay was waiting for him, as well groomed as if she had come from a beauty parlor. Hammond watched the sun play on her hatless head, as with her mother, they went down the trail. Then at last, on the banks of Loon creek, the man pointed out the claim which he had saved for her, a stretch of gravel extending along the stream near where upturned stones and earth told of the workings held by McKenzie Joe and himself.

"I got them as near mine as I could," he announced.

"And is this a claim?" asked Kay. "Why, it's just the bank of the stream!"

"Look," Hammond answered. All along the creek were evidences of the high water, men labored at the shoveling of earth into long, wooden sluice boxes which, picking up the water from a flume running from a higher point in the stream, carried it down on a slow decline.

"You just wash it through and it becomes gold?" Kay said curiously.

"Isn't that cute?"

"It looks like a day laborer's job to me," the miner reflected.

A shout answered her, from upstream, where the raw-boned Olson and two partners were working.

"Stanley! labor stopped elsewhere. Necks craned. Heads appeared above the higher portions of earth, where the stream temporarily ran between cut banks. Then men began to converge upon the sluice box."

"Let's go up," Hammond exclaimed. "Olson's found something in the clean-up."

"The clean-up?" Kay asked, hurrying beside him. Mrs. Joyce following somewhat in their wake, glancing acridly about her, a woman who seldom smiled, who seldom gave content, yet who seemed to have a weighing everything within her range. Hammond turned to explain.

"Yes, the clean-up. You see, those long wooden chutes are called sluices. They've got cleats across the bottom, called riffles. The dirt is shoveled in at the top and is carried along by the water. The dirt and light gravel flow on. Anything heavier settles behind those riffles."

"Oh, I see. Then you stop shoveling and pick up the gold."

"Not that easy. It takes a long time for the riffles to stop up. Then everything they've caught is scraped out. After that the miners pan it."

"Pan it?"

"Yes—there one." He pointed to a discarded gold pan on the creek's bank, flat bottomed and with sharply sloping sides. They put the scrapings in there and drag water into it, swishing it around. It takes a long time to get rid of everything but the nuggets."

"Oh, I'd love to see a nugget again. Like those you gave me in Seattle."

Hammond laughed.

"It looks like you'll get your wish, Olson's pretty excited."

"Pan it?"

"Yes—there one." He pointed to a discarded gold pan on the creek's bank, flat bottomed and with sharply sloping sides. They put the scrapings in there and drag water into it, swishing it around. It takes a long time to get rid of everything but the nuggets."

"Oh, I'd love to see a nugget again. Like those you gave me in Seattle."

Hammond laughed.

"It looks like you'll get your wish, Olson's pretty excited."

Noted Naturalist

Jack Miner Guards The Future Of Hunting (By Lance Connery)

Little did Kingsville folks realize the development that was to come when Jack Miner established his bird sanctuary just 35 years ago. Today he is one of the best known citizens in the Dominion of Canada and visitors to the sanctuary number thousands annually.

The white-haired naturalist with his well known Vancouver as he is in Halifax. And as well known as himself are the many sanctuaries and centres of wild life conservation that have arisen as a direct result of his efforts. Not only have many individual refuges for birds been established, but many government sanctuaries, too.

Prevention, not cure of the ills of man's relationship to his wild comrades is the naturalist's aim, and he has secured whole-hearted co-operation from many of the hunters whom some have thought opposed to his activities. More and more are they beginning to realize that men like Jack Miner are guarding the future of North American hunting.

The sanctuary system is a sure bulwark against tendencies of extermination which all too frequently are noted in the modern hunter, with his up-to-date equipment and keen urge to kill.

Governments, too, realize that without preservation of wild game revenues from sales of shooting licenses would soon dwindle. Full support from the authorities has consequently been forthcoming.

This simple woodsman with such clear-cut views on conservation is a world figure now, yet only this week he followed a tractor and disc in preparing ground before his home for flower planting. Few passing motorists recognize him by sturdy figure, his bush-brimmed straw hat and workmanlike overalls as the noted naturalist.

Governments, too, realize that without preservation of wild game revenues from sales of shooting licenses would soon dwindle. Full support from the authorities has consequently been forthcoming.

Nothing Wrong With It

"Purge" Still Is Considered A Perfect Good Word

A woman in New York writes to her favorite newspaper to say that she doesn't like the word "purge."

She wonders why so many political writers in this country have "avidly seized upon it" and show a liking for "verbal expressions of a nation whose ideas and institutions are so at variance with ours."

Apparently she thinks that "purge" comes out of Germany or the Soviet Union or China, where the thing it stands for is known, but the word itself is not.

The ancient Roman used the verb "purgo" to "make pure."

The French took it up and passed it on to the English.

Shakespeare and the King James Bible refer to "purgings" and "purgings."

The first use of the word in its present political sense appears to have been in connection with "Pride's Purge."

Gen. Thomas Pride was deputed by Cromwell in 1648 to "purge" the British House of Commons by ejecting from it all members who refused to vote as Cromwell wished them to.

With that distinguished pedigree behind it, why should anyone in this country object to the adoption of this very apt and pungent word into the American political vocabulary?—Detroit Free Press.

A Changing Shore Line

Launching Of Big Ships Keeps Banks Of Clyde Moving

If any one thinks for a moment that he or she can escape the new ships which are coming out, they just haven't been about where the mimosine smoke blows the meanest. Of all the tales we like, particularly, the one of the new Queen Elizabeth, states Robert Wilder, in the New York Sun.

Built on the Clyde, a narrow stream, if ever, and launched into water which is a full 200 feet narrower than the ship itself, the John Brown shipyards are forced to blast out the additional feet from the opposite bank to allow her stern to sink in and the ship herself to be turned around. This would be routine enough, save for the fact that the same thing had to be done for the Queen Mary. The banks, however, all in, Cunard continues to build ships. The result is there is a fine time on the opposite banks, what with blasting and all and the natives never quite knowing where the shore line is to be the next morning.

At the moment, we understand, they are holding their collective breath and wondering when, if ever, they will be allowed to pursue their heretofore peaceful ways and perhaps catch a fish or two before Cunard is up and at them again.

Possessions Of Famous People

Souvenirs Which Would Be Valuable Have Not Been Preserved

Sir Hesketh Bell has had a varied professional career. It ranged from the Bahamas to Uganda, where he was the first Governor. He is now 74, and a very old family friend of the Chamberlains. Joseph Chamberlain left him his historic eyeglasses on his demise.

Appropos of which it is a really intriguing problem what actually happens to the distinctive possessions of famous people. What has happened, for instance, to the late Lord Haldane's walking stick, made of late explosive, which was used to put the wind up for M.P.'s? Who now possesses the late Earl Balfour's fiddle, on which that great philosopher was wont to amuse himself in leisure moments? Are any of the G.O.M.'s much-caricatured Gladstone collars still in existence?

Some souvenirs of this personal genre no doubt find their way to Madame Tussaud's but there are a legion of others.

Claims World's Record

Australian Farmer Sows 920 Acres Of Wheat In 129 Hours

An Australian farmer in Victoria has just sown 920 acres of wheat in 129 hours, which he claims to be a world record. For six days he worked eight hours a day with a tractor, travelling seven or eight miles an hour. Four men worked the tractor in six-hour shifts.

Freezes When Touched

Pure water, standing quietly in a laboratory doesn't actually freeze at the freezing point of 32 degrees. Indeed, in such circumstances, pure water has been known to remain liquid until the temperature went down to zero. But the instant the water's touched, it turns to ice.

The sea cucumber, a relative of star fishes, discards portions of its body when food becomes scarce, and replaces them when times get better.

COMFORT! CONVENIENCE! SAFETY!

With a JOHNSON CHORE HORSE

Brilliant Electric Light Constant Dependable Power

NOW! at low cost (as low as \$69.50), with a new Johnson Chore-Horse, enjoy the comfort and convenience of electric light and power at the touch of a button. It operates on the 110-volt, 60-cycle current, and is available in a full range of capacity from 150 to 800 watts and includes engineering advancement exclusive to Johnson. Precision-built manufacturing guarantees free operation, while sturdy construction insures years of satisfactory service under severe conditions. Whether your particular requirements call for the smaller size units or for the super-power 800 watt 32 volt model, you'll find a Johnson Chore-Horse, most properly priced, that will serve your requirements best. Write today for free folder and complete information. Investigate, fully, the advantage offered by the Johnson Chore-Horse.

CHINOOK MEAT MARKET

About 80 per cent of the threshing in the Big Stone district is completed with crops averaging about 10 bushels to the acre. One particularly good field on Mr. Hogaell's farm yielded 20 bushels.

Mr. and Jas. Peyton of Chinook and Mr. and Mrs. W. Peyton motored to Youngstown for service in the St. Pauls Church

Since Monday's rain all threshing operations have been stopped, and not until Wednesday evening it's still wet.

Miss Margaret Paetz is a newly enrolled pupil in Scotfield Consolidated school, she expects to complete her grade XII this year.

Mrs. J. C. Bayley purchased the Chinook Meat Market building and equipment from Mrs. P. Peterson

The dance which was to have been held at the Cloverleaf School, in aid of the Cerebral Hospital, on October 10th, has been postponed indefinitely owing to bad roads.

The Red bus was delayed about two hours as a result of the heavy rain on Monday. It left Youngstown about 5:45 p m.

United States crop estimator Cromwell, places the Alberta crop at 141 million bushels, compared with 124 million, which he estimated on August 1st.

Some of the newer automobiles are equipped with illuminated vanity mirrors so women can see to put on the make-up. It might be possible to connect the powder puff with the windshield wiper to make the whole process automatic.

RAIL BARGAIN FARES \$4.65 RETURN CHINOOK TO CALGARY

Low Fares also from stations between
SIBBALD and NORFOLK;
BYEMOOR and DOWLING.
Good Going:
OCTOBER 14th and 15th.
Returning:
Leave Calgary up to and including
OCTOBER 18th.

Good in coaches only. No baggage checked. Children five years and under twelve, half fare.

Engineering Marvels at Vancouver

The Empress of Japan, Queen of the Pacific, passing under the splendid new bridge now under construction across the First Narrows, the entrance to Vancouver's landlocked harbor. The mainmast of the vessel is 195 feet above her load line, the bridge being 200 feet above high Spring tides.

The Canadian Pacific liner Empress of Japan, in addition to holding all the speed records on her Canada, Hawaii, Orient run is the largest ship entering Vancouver Harbor. The illustration clearly shows the magnitude and the beauty of both ship and bridge.
